Master in Education – Analysis and Intervention in Education Systems (MISE) is designed for people who seek the training necessary for research in education and for intervention in education systems, and who would like to work in academic research, inspection/assessment, evaluation, or the design of education programmes. This Master’s programme offers courses and an internship that (1) develop students’ knowledge of learning processes, teaching methods, educational settings, the functioning of education systems, and education policies; (2) prepare students to design educational intervention measures; (3) reinforce methodological skills (scientific reasoning, assessment, oral and written presentation of results) and guarantee mastery of quantitative and qualitative tools for research in education.
