Merit-based admission.

Master’s Programme
THE MASTER IN SPEECH AND LANGUAGE THERAPY

is a professional degree recognised across Switzerland and designed to train speech and language therapists. The programmes combines psychology, language sciences, education, neuroscience and medicine and includes a significant hands-on clinical training component, while providing students with a solid scientific foundation through lectures and research. The objective is two-fold: to train students in the scientific study of speech, language, human communication and related disorders and to prepare them for the primary professional activities of speech and language therapists, namely, counselling and prevention, assessment and diagnosis, support and follow-up of patients with disorders affecting the voice, speech, spoken and written language and the ability to swallow or communicate.
STUDY PROGRAMME
4 semesters (max. 6 semesters) | 120 ECTS credits

Courses
34 credits
Communication and language disorders in children; neuropsychology of language in adults; clinical audiophonology, etc.

Clinical training
50 credits
Problem-based learning seminar: developmental disorders; Acquired disorders: Practical analysis; Professional awareness; Work placements; Block courses, etc.

Electives
6 credits

Research training
30 credits
Research symposium; Dissertation.

ADMISSION PROCESS FOR THE MASTER
As the number of places for the practical training module is limited, the admission process comprises three stages:

- Eliminatory language proficiency test
- Evaluation of the admission application and day of examinations
- Interview (for the applicants with the best examination results)

More information on the admission process is available on the website of the Master in Speech and Language Therapy.
