Master's Programme
THE MASTER IN PUBLIC MANAGEMENT

The Master's in Public Management is an interdisciplinary programme with strong European and international foundations. It is a point of intersection between the academic and professional worlds, and helps students to master the tools and principles of effective and efficient management of public policy and organisations. It offers a critical examination of the current re-evaluation of the role of the State and the various proposals to reform government, liberalise public services, and privatise public companies. Students may complete a work placement in lieu of a thesis.

This Master's programme is the sole Swiss partner of the prestigious EMPA (European Master in Public Administration) network, which includes around ten institutions renowned for their public management studies programmes. Students of the Master's in Public Management may spend one semester at a partner university. In addition to the Master's from UNIGE, students have the possibility of obtaining the European EMPA degree.
