Master's Programme

THE MASTER IN SOCIO-ECONOMICS

Equips students with the theoretical and practical skills needed to analyze and combat social inequalities in a world in rapid transition. This interdisciplinary Master's program stands out by offering advanced training in quantitative and mixed methods, and by preparing students for public action aimed at acting on these inequalities, whether through public social policies or citizen and associative alternatives. In addition, the Master's program offers the opportunity to study these issues in Switzerland, elsewhere in Europe or on other continents (Latin America, Africa, Asia), always in conjunction with local players. The Master's degree is geared towards the transition from theory to practice, through research (dissertation) or the concrete valorization of knowledge at the frontier between studies and working life (internship).

SPECIALISATION OPTIONS:

- Social Policy
- Development and Solidary Alternatives
- Demographics and Quantitative Methods

www.unige.ch/sciences-societe/formations/masters/socioeconomie
