Master's Programme

THE MASTER IN URBAN AND REGIONAL PLANNING

offers in-depth training in the areas of town and country landuse planning, urban development and landscape planning, in the North and in the South. The programme puts a strong emphasis on practical experience (through project-based workshops or internships, for example), allowing students to develop the expertise necessary to make territorial diagnoses and to design and implement urban planning projects or coordinate the processes and stakeholders involved in urban and regional development. Students also acquire in-depth knowledge of the technical, legal, and practical tools used by professionals on a daily basis.

The critical thinking aspect of these activities is another major focus of the programme: while students are required to master various tools and techniques, they must also develop reflective and critical approaches to urban and regional development in order to anticipate current

CONCENTRATIONS UNIGE:

Regional Development I Territorial Development in Global South I Urban Planning and Design

CONCENTRATIONS HES-SO:

Geomatics Engineering I Landscape Architecture I Land Management

OBJECTIVES:

The Master in Urban and Regional Development provides comprehensive training in the areas of regional, city and landscape planning. Training is provided via workshops which foreground the methods and tools used in urban and regional planning professions (diagnostics, projects, drawings, mapping, scale models, etc.).

The aim of the programme is to provide in-depth initial training that prepares graduates for the job market.

COMPLEMENTARY TRAINING:

As a complement to the Master's in Territorial Development, students have the option of taking the Complementary Certificate in Geomatics (30 credits). The certificate is designed to provide students with training centred on new simulation technologies which use spatial referencing, in a practical, interdisciplinary setting.

STUDY PROGRAMME
4 semesters (max. 6 semesters) | 120 ECTS credits

First semester
Basic courses common to all concentrations (18 to 30 credits):
• Practical workshop
• Theoretical courses

Second and third semesters
Teachings specifics to each concentration (48 to 60 credits):
• Practical workshops
• Theoretical courses

Electives courses related to the chosen concentration (12 credits)

Fourth semester
30 credits
Research thesis or work placement dissertation, or thesis related to an individual or a collective project. The thesis is related to the chosen concentration.
