### *Master's Programme*

## THE MASTER IN SOCIOLOGY

offers students the critical tools and means to evaluate social, organisational, and individual dynamics in the economic, political, and social spheres of the modern world. The programme is aimed at training future sociologists in the fundamental qualitative and quantitative methods of the discipline: digital, visual, and anthropological methods, as well as network construction and analysis. The programme is designed around a full-scale group research project that allows students to put the methodologies they have studied into practice. In this stimulating environment, students will learn how to create problems and engineer their solutions, and how to define the terms of a research project and carry it out successfully. Individual coaching means students can develop conceptual and methodological autonomy, allowing them to make their own unique contributions to sociological knowledge.
