Master’s Programme
THE MASTER IN SUSTAINABLE SOCIETIES AND SOCIAL CHANGE

addresses the role of society as central to transformations towards sustainability, offering conceptual handles and practical tools for better understanding how societies are organized and regulated, while delivering instruments for supporting social change. By bridging theory with practice, students gain access to key concepts and central themes - such as sustainable consumption and production dynamics, social movements and the role of organizations, or corporate responsibility and supply chain management. The course program builds core skills grounded in interdisciplinary approaches, including the role of different actors / sectors / processes towards sustainable social change. The methodological courses deliver competencies for working with both qualitative and quantitative methods, along with experiences in conducting applied research projects. Originally launched in 2011 as the Master in Standardization, Social Regulation and Sustainability, the role of sustainability standards remains a central theme, thanks to a partnership with the International Organization for Standardization (ISO).

STUDY PROGRAMME
4 semesters (max. 6 semesters) | 120 ECTS credits

Required courses
72 credits

- Quantitative Methods
- Workshop 2B: Sustainable Consumption and Social Change
- Master Thesis or Internship Report

Electives
24 credits

Master's thesis or internship report
24 credits

PROFESSIONAL PROSPECTS
Since the launch of the program in 2011, close to 100 alumni have gone on to find careers in the public and private sector, as well as among international organizations - in Switzerland and internationally. A 2016 survey by our students found that a majority of our graduates were able to find a suitable job within six months of graduation. In 2019, a similar survey among alumni found that the internship opportunities during their studies were a valuable asset for their job search. The program benefits from an external Advisory Committee, made up of actors from public administration, the private sector, and from among International Organizations. The aim of the AC is to ensure the professional relevance of the program, and make links between the "world of work" and studies.

UNIVERSITY TAXES
500 CHF / semester

REGISTRATION
Deadline: 28 February 2022
